

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Application No. : 10/560,251 Confirmation No. : 5017
First Named Inventor : Akihiro ISHII
Filed : December 12, 2005
TC/A.U. : Unassigned
Examiner : Unassigned

Docket No. : 038788.56806US
Customer No. : 23911

Title : Process for Producing Optically Active 1- Alkyl-Substituted
2,2,2-Trifluoroethylamine

SUBMISSION OF INTERNATIONAL PATENTABILITY REPORT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

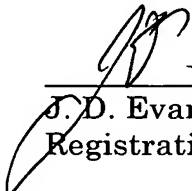

Sir:

For the information of the Examiner, submitted herewith is a copy of the English Translation of the International Preliminary Report on Patentability for the parent PCT application.

If there are any questions regarding this submission or the application in general, a telephone call to the undersigned at (202) 624-2845 would be appreciated since this should expedite the prosecution of the application for all concerned.

Respectfully submitted,

May 16, 2006

J.D. Evans
Registration No. 26,269

From the INTERNATIONAL BUREAU

PCT

NOTIFICATION OF TRANSMITTAL
OF COPIES OF TRANSLATION
OF THE INTERNATIONAL PRELIMINARY REPORT
ON PATENTABILITY
(CHAPTER I OR CHAPTER II
OF THE PATENT COOPERATION TREATY)
(PCT Rules 44bis.3(c) and 72.2)

To:

HASHIMOTO, Takeshi
c/o Shiga Patent Office
Ekisaikai Bldg.
1-29, Akashi-cho
Chuo-ku, Tokyo 1040044
JAPON

Date of mailing (day/month/year) 09 March 2006 (09.03.2006)		
Applicant's or agent's file reference P04CG-012WO	IMPORTANT NOTIFICATION	
International application No. PCT/JP2004/007955	International filing date (day/month/year) 08 June 2004 (08.06.2004)	
Applicant CENTRAL GLASS COMPANY, LIMITED et al		

1. Transmittal of the translation to the applicant.

☐

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter I).

☒

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

EP, KR

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2004/007955

Box No. I

Basis of the report

1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
- ☐ This report is based on translations from the original language into the following language _____ which is the language of a translation furnished for the purposes of:
- ☐ international search (Rule 12.3 and 23.1(b))
- ☐ publication of the international application (Rule 12.4)
- ☐ international preliminary examination (Rule 55.2 and/or 55.3)
2. With regard to the elements of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report)*:
- ☒ the international application as originally filed/furnished
- ☐ the description:
- pages _____ as originally filed/furnished
- pages* _____ received by this Authority on _____
- pages* _____ received by this Authority on _____
- ☐ the claims:
- nos. _____ as originally filed/furnished
- nos.* _____ as amended (together with any statement) under Article 19
- nos.* _____ received by this Authority on _____
- nos.* _____ received by this Authority on _____
- ☐ the drawings:
- sheets _____ as originally filed/furnished
- sheets* _____ received by this Authority on _____
- sheets* _____ received by this Authority on _____
- ☐ a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.
3. ☐ The amendments have resulted in the cancellation of:
- ☐ the description, pages _____
- ☐ the claims, nos. _____
- ☐ the drawings, sheets/figs _____
- ☐ the sequence listing (*specify*): _____
- ☐ any table(s) related to sequence listing (*specify*): _____
4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
- ☐ the description, pages _____
- ☐ the claims, nos. _____
- ☐ the drawings, sheets/figs _____
- ☐ the sequence listing (*specify*): _____
- ☐ any table(s) related to sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2004/007955

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-12	YES
	Claims	NO
Inventive step (IS)	Claims	YES
	Claims 1-12	NO
Industrial applicability (IA)	Claims 1-12	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

Document 1: JP 2002-30048 A1 (Central Glass Co., Ltd.),
29 January 2002, claims and example 2

Document 2: JP 10-182578 A (Director General of the
Agency of Industrial Science and
Technology), 07 July 1998, paragraphs [0007]
to [0011], [0014] and [0055]

(1) The inventions set forth in claims 1 and 3 do not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

Document 1 discloses the feature of converting an optically active imine into an optically active secondary amine by means of an asymmetric reduction reaction using a palladium catalyst in a hydrogen atmosphere, and thereafter hydrolysing said optically active amine in order to produce an optically active α -methyl-bis-3,5-(trifluoromethyl)benzylamine.

In addition, document 2 discloses imine compounds wherein the structures of the substituent group portions that have bonded to the nitrogen atoms of the imine are similar to the structures of the corresponding portions in the optically active imines that are disclosed in document 1, and discloses optically active 1-alkyl

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2004/007955

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

substituted-2,2,2-trifluoroethylamines wherein the structures of the locations where the asymmetric carbon atoms have bonded with the amino groups or the alkyl groups are similar to the structures of the corresponding portions in the optically active α -methyl-bis-3,5-(trifluoromethyl)benzylamines that are disclosed in document 1.

In the written response, the applicant asserts that the 3,5-bis-CF₃-phenyl group of the optically active imines that are disclosed in document 1 and the perfluoroalkyl group of the imine compounds that are disclosed in document 2 have different electron withdrawing strengths, and that therefore, the optically active imines that are disclosed in document 1 and the imine compounds that are disclosed in document 2 have different chemical environments with regards to their electrons.

However, despite their different electron withdrawing strengths, both the 3,5-bis-CF₃-phenyl group and the perfluoroalkyl group are electron attracting groups; therefore, there are not considered to be any structural differences between the optically active imines that are disclosed in document 1 and the imine compounds that are disclosed in document 2 which would be sufficient to significantly change the characteristics of the reaction. As a result, it would have been easy for a person skilled in the art to conceive that the imine compounds that are disclosed in document 2 will express reaction characteristics similar to those of the optically active imines that are disclosed in document 1, and that it would be possible to produce an optically active 1-alkyl substituted-2,2,2-trifluoroethylamine by

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2004/007955

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

subjecting an imine compound to asymmetric reduction and then to hydrolysis.

(2) The invention set forth in claim 2 does not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

Refer to the explanation in section (1), above.

In addition, document 1 indicates that asymmetric reduction is carried out at a temperature of between -50 and 150°C; therefore, it would have been easy for a person skilled in the art to select an appropriate temperature within said range.

(3) The invention set forth in claim 4 does not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

Refer to the explanations in sections (1) and (2), above.

Furthermore, document 1 discloses the feature of producing an optically active imine by dehydrating and condensing ketones and optically active amines under acidic conditions; therefore, a person skilled in the art could have produced the imine compounds that are disclosed in document 2 by means of the method in question, as appropriate.

(4) The invention set forth in claims 5 to 8 does not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

Refer to the explanations in sections (1), (2) and (3), above.

In addition, recrystallization is a commonly used

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No:

PCT/JP2004/007955

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability:
citations and explanations supporting such statement

refining operation, as is apparent from the fact that document 1 discloses the feature of carrying out a refining operation such as recrystallization as an after-treatment for an asymmetric reduction reaction; therefore, it would not have required significant creativity to select the operation in question.

(5) The inventions set forth in claims 9 to 12 do not involve an inventive step in the light of documents 1 and 2 cited in the international search report.

It would have been easy for a person skilled in the art to conceive of synthesizing optically active secondary amines by subjecting the imine compounds that are disclosed in document 2 to an asymmetric reduction reaction, as indicated in sections (1) to (4) above.

Furthermore, the optically active secondary amines in the inventions that are set forth in the present application are merely intermediates, and do not exhibit any special activity in and of themselves; therefore, said amines do not affect the determination of whether or not the effects of the inventions that are set forth in the present application involve an inventive step.
